EXPERIENCE

React Front-End Developer with 3 years hands-on experience in building responsive web applications using **React.js**, **Next.js**, and modern JavaScript tools. Proficient in **server-side rendering (SSR)** with **Next.js** to enhance SEO and improve page load performance. Experienced in developing dynamic, high-performance applications, implementing real-time communication using **Socket.IO**, and integrating third-party services (e.g., **Google** and **Facebook login**, **Google Geolocation API**).

Key Achievement: Collaborated with 8+ product teams and back-end developers to implement new features, design API endpoints, and create request/response payloads.

- **Designed and developed responsive web applications** using **React.js**, **Next.js**, and **React Redux** to create dynamic, high-performance user interfaces.
- Implemented **server-side rendering (SSR)** with **Next.js** to enhance page load speed and improve SEO performance..
- Utilized **Axios** for making HTTP requests and managing state in applications, ensuring smooth data flow between front-end and back-end services.
- Integrated **Socket.IO** for real-time communication in web applications, providing features like chat and live updates.
- Enabled **social login** (Google, Facebook) to allow users to authenticate seamlessly with external accounts, enhancing user experience and simplifying sign-up processes.
- Leveraged **Google Geolocation API** to provide users with real-time location data, enabling location-based services like map integration and location tracking.
- Collaborated with UI/UX designers to implement **Ant Design** and **Material-UI** components, ensuring a consistent and polished user experience.
- Worked with **Git** and **GitHub** for version control, maintaining a clean development workflow and enabling smooth collaboration within teams.

EDUCATION

M.Sc. in Information Technology & Computer Applications

Swami Vivekananda College, Surendranagar | 2023

SKILLS

Languages & Technologies:

- HTML, CSS, JavaScript, TypeScript

Libraries & Frameworks:

- React.js, React Redux, Next.js, Socket.IO, Bootstrap, Axios

Version Control:

- Git, GitHub

UI & Design Systems:

- Ant Design, Material-UI, React Bootstrap, Tailwind CSS, DaisyUI, Sass

Integrations & APIs:

- Social Login (Google, Facebook, etc.)
- Google Geolocation API (location-based services, map integration)

PROJECT

Turn-To

- Developed **responsive web applications** using **React.js** and **Next.js**, enabling job seekers and employers to create detailed profiles and interact on the platform.
- Implemented **AI-powered job matching algorithms** to calculate a match ratio between user profiles and job postings, improving job application accuracy.
- Integrated **Socket.IO** for real-time notifications and communication between users and employers.
- Enabled users to **view job locations on a map** and estimate **travel time**, improving the user experience and accessibility of job opportunities.

Hukup

- Designed and developed a **responsive dating app** using **React.js** and **Socket.IO**, enabling real-time interactions between users.
- Implemented **chat flow features** that allow users to send and receive messages in real-time, improving engagement.
- Integrated **photo and video sharing** capabilities, allowing users to connect more personally.
- Enabled users to **follow each other, like posts**, and share updates, improving user interaction and platform engagement.

Referral Rangers

- Designed and developed the **responsive platform** that connects users with work opportunities.
- Created **match-making algorithms** to connect job seekers with suitable employers, improving job placements.
- Built an **admin dashboard** to track job assignments and commissions, ensuring transparency and accountability.
- Integrated **API for dynamic data fetching** and improved **user registration flow**, increasing platform accessibility.

Talentverse

- Designed and developed **responsive web applications** using **React.js** and **Next.js** to support a diverse community of **artists, creators, and learners**.
- Integrated **social login** (Google, Facebook) to enable seamless user registration and authentication, enhancing user experience and onboarding.
- Implemented **server-side rendering (SSR)** using **Next.js** to improve SEO and page load times, resulting in better search engine rankings and user retention.
- Developed and integrated real-time communication features using **Socket.IO** to connect users and provide dynamic interaction.
- Built user interfaces using **React Bootstrap** and **Tailwind CSS** to create a modern, clean, and consistent design.

Leave Management System (Admin Panel)

- Designed and developed the **Admin Panel** using **React.js** and **React Bootstrap**, providing an intuitive UI for managing employee leave requests.
- Integrated data display and management functionality by connecting the front-end to the **backend API** to pull real-time data for leave requests.
- Enabled admin users to **add, update, and delete leave requests** in real-time, ensuring efficient management.
- Ensured **data security** and **role-based access control** to ensure only authorized users could access sensitive data.

Dwarkadhish (Admin Panel)

- Developed the **Admin Panel** using **React.js** and **React Bootstrap**, offering real-time data updates via **Firebase**.
- Implemented dynamic content management features, enabling easy synchronization of content between the **admin panel** and **mobile app**.
- Integrated **Firebase real-time database** for instant updates, improving data management efficiency.
- Designed **responsive UI** to ensure a seamless user experience across devices.

Coverage-Samurai

- Designed and developed a **responsive web application** that helps users find the best insurance policies based on vehicle details.
- Integrated **API endpoints** to display **dynamic insurance options**, tailored to the user's vehicle information.
- Implemented **Socket.IO** for real-time updates on available policies and price changes, enhancing the user experience.

Bird-Song

- Focused on fixing **responsive design issues** to improve cross-device user experience.
- Implemented an **interactive audio player** to allow users to explore bird sounds, enhancing user engagement.
- Integrated educational content on birds and their calls, contributing to the platform's role as an informative tool for nature lovers.

Rajgokul Tea

- Developed a **responsive e-commerce platform** using **React.js** and **React Bootstrap** for selling premium tea products.
- Integrated **secure payment gateway** to enable users to purchase tea products seamlessly.
- Implemented **API integration** to dynamically display product information and manage orders, streamlining the shopping experience.
- Focused on **user-friendly design**, ensuring a smooth and intuitive purchasing process.

Personal Traits

- **Logical Thinking:** Ability to analyze complex problems and develop efficient solutions.
- **Quick Learner:** Eager to learn new technologies and tools, adapting quickly to changing environments.
- **Responsible:** Demonstrated reliability in meeting deadlines and taking ownership of tasks and projects.
- **Good Listener:** Effective at understanding and responding to team members and clients' needs.
- **Self-Driven:** Motivated and proactive, with a strong sense of ownership in achieving results and meeting goals.
